MultiDISC Inserter

If your aim is to reduce production costs, or increase productivity and so increase margins, then the **MultiDISC Inserter**, with its unrivalled return on investment is the perfect assembly solution for you.

Your **MultiDISC Inserter** is the most adaptable machine available, allowing you to insert CD and DVD discs into virtually any sleeve product. You are given the capability to switch between Paper Sleeves, Tyvek® Sleeves, Multi-Disc Sleeves and Plastic Sleeves at a minimal downtime.

Blending principle values of Pack-Smart with leading edge technologies, the **MultiDISC Inserter** helps you approach and capture new markets with high added value.

A robust mobile heavy duty construction allows you to place your machine in a convenient location at your production facility.

MultiDISC Inserter Advantages

- Self-contained vacuum system allows you to easily mobilize the machine
- Global remote diagnostics permits production managers to monitor and resolve machine issues from anywhere in the world via Ethernet connection
- A color 6" touch screen provides you with quick access to machine controls and product recipes
- Shingled delivery with batch counting monitors production and machine efficiency
- Servo driven precision ball screw mechanism provides exact product handling
- 4-Axis servo controller allows you to make precise motion adjustments
- The machine is fully equipped with 4—30" self feeding magazines which can hold up to 600 discs and 600 sleeves per magazine

Production Speeds

1—Up

50 cycles/minute X 4 = 200 Discs per minute = 50 / 4 Disc sleeves per minute

2—Up

50 cycles/minute X 4 = 200 Discs per minute = 100 / 2 Disc sleeves per minute

Machine Requirements

Electrical— 230 VAC, 1 Phase, 15 A

Air—60 PSI @ 10 CFM
