FPG Flexo Pattern Glue

Flexo Pattern glue module applies metered glue coatings to sheets or webs. FPG units are equipped with state of the art servo technology and registration systems for integration with Pack-Smart or third party equipment.

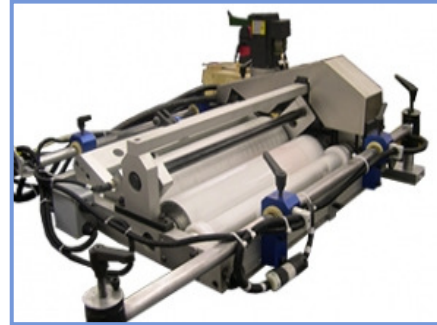

The distinctive advantage of using flexo pattern gluing technique is the ability to produce unlimited shapes of glue and coatings without changing sheet direction. Flexo pattern glue module consists of two rollers allowing for glue application, fragrances or coatings. Precision ground Anilox cylinders eliminate slinging and increase durability of the system.

FPG Standard Features

- High torque brush-less servo drive with Ethernet Power link network module
- Low backlash planetary gear system
- Selective gluing feature
- Missing product detection
- Continuous registration module
- Rigid mounts
- On the fly placement glue position adjustment
- Remote emergency stop
- Motorized doctor roller
- Horizontal position adjustment module
- Top safety guard with interlock
- 6", 12", 24", " repeat application cylinder

Application of Flexo Pattern Glue

- Rigid and Flexible Windowing
- Media Packaging
- Gift Card & Security Packaging
- Remoistable pattern gluing
- Mailer and envelope production
- Coatings
- Scratch Varnishes
- Burst and Open sample fragrances
