## Rotary Creasing Module

The Pack-Smart rotary scoring/slitting system is designed to deliver a high quality product at all times for the demanding paper finishing customers. Designed with accuracy and functionality in mind the PRS unit is equipped with six hardened shafts and quick change over features, as well as “on-the-fly” depth adjustments.

Our modular design allows for offline configurations or inline with Pack-Smart or third party integration. A servo driven control module ensures 100% accurate synchronization with sheet feeding and alignment modules. The PRS is capable of handling stocks from light 16lb stock to heavy 24 pt coated paperboards.

### Standard Features

- 6 x35 mm harden shafts
- Micro adjustment x 6
- Independent servo drive controlled
- Safety guard with interlock
- 6 transfer collars
- 2 scoring sets

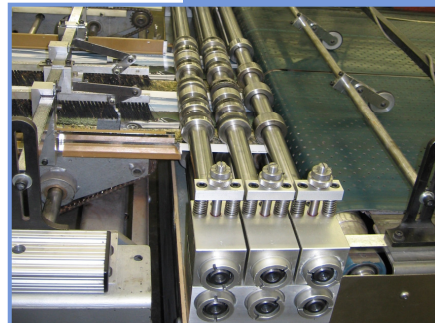

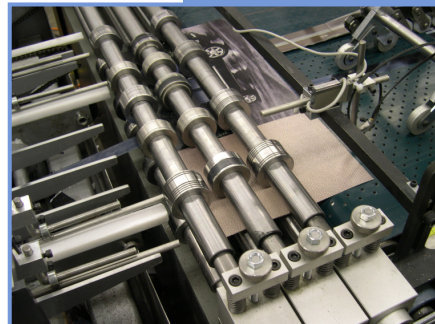

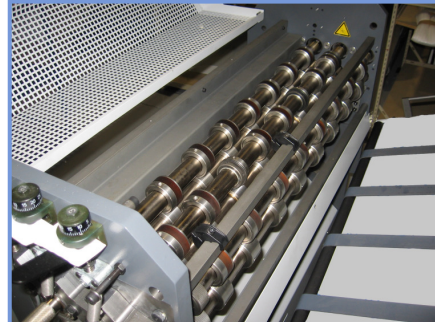

**Available Widths:** 12” 20” 30” 36” 44”

### Power Requirements:

220 VAC

35 AMPS

1 Phase
