

HSBBO-3000

HIGH-SPEED BATCHING BUNDLING
AND OVERWRAPPING SOLUTION

ELIMINATE MANUAL FEEDING
AND REDUCE COSTS
IN YOUR PACKAGING PROCESS

HSBBO-3000

HIGH-SPEED BATCHING BUNDLING AND OVERWRAPPING SOLUTION

RELIABLE SOLUTION WITH LOW COST OF OWNERSHIP

HSBBO-3000 is the most reliable and modular solution to integrate your upstream applications into your wrapper packaging process and designed for 24/7 working environment. Applications such as product feeding, batching, collating, affixing, printing and labelling are easily integrated in the in-feed process allowing you to reduce manual labor and improve production efficiency.

HSBBO-3000 series are available with Vertical Form Fill Seal and Horizontal Flow wrappers to match different product requirements and speeds, across FMCG, personal care, food and pharmaceutical industries.

KEY FEATURES

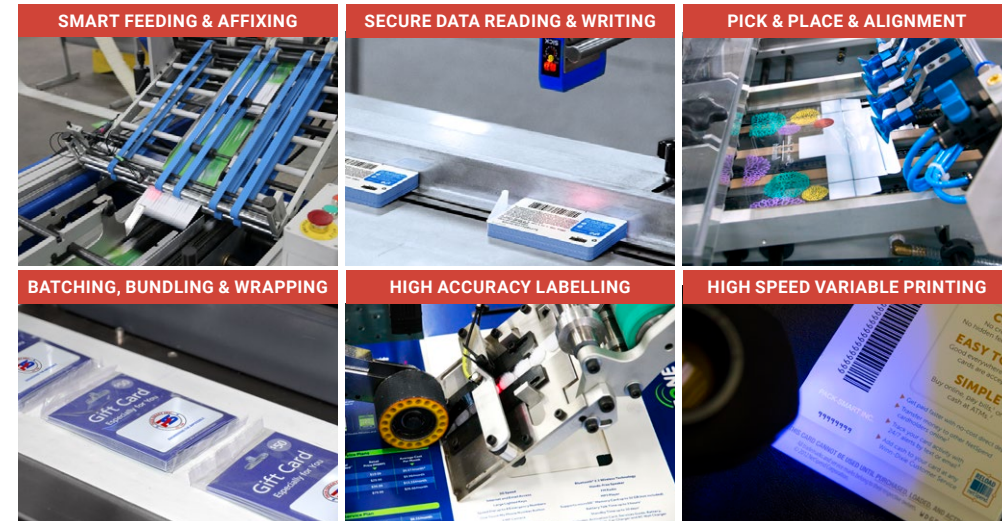

- Speeds up to 2000 PPM (based on product application)
- Hermetically sealed packages
- Cantilevered construction
- Stainless steel frame
- Compact and ergonomic design
- Auto-splicing feature

WHY HSBBO-3000

HSBBO-3000 servo cutting head drive matches crimper velocity with web speed, over a wide range of both machine speed and package cut-off length. The HSBBO-3000 wrapper handles most commonly used films including polypropylene, heat-sealable cellophane, poly-coated paper or cold seal materials, laminates, high-density polyethylene, and shrink or PVC film. The mechanical adjustments feature scales for previous set-up reference.

PROVEN HIGH-PERFORMANCE TECHNOLOGIES

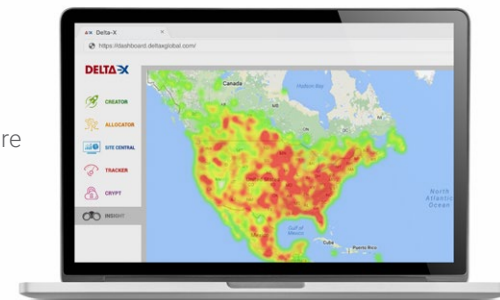

ADDITIONAL IN-LINE CAPABILITIES

- Variable data printing
- Print/bar code verification
- Registration and alignment
- High accuracy fixing and joining
- Stacking and collating
- Gluing and coating
- Weight check and rejection
- Quality assurance
- Dashboard and data management through our Delta-X software

DELTA-X SUITE

DATA READING, WRITING, VALIDATION AND REPORTING

A secure, scalable, field-proven suite of software applications, combined with manufacturer-deployable hardware, enables users to create, embed, manage and connect personalized product and packaging data.

ENGINEERING THE IMPOSSIBLE

For 25 years, Pack-Smart Inc. offers modular packaging solutions bringing complete automation to every packaging need. Pack-Smart provides vital solutions by integrating revolutionary innovations and delivering engineering spectacle while upholding client's brands and values.
